

As a flight attendant with American Airlines I am asking you to leave the current cell phone policy in place while in-flight. I have listed some facts as to why the use of mobile phones need to be banned while aircraft are in the air.

There is no hard evidence that cell phone use does not interfere with navigational instruments.

Cell phone use would enable terrorists to coordinate a plan of action more effectively.

The NPRM would leave it up to flight attendants to police the use of cell phones onboard the aircraft compromising our ability to maintain a safe, secure cabin environment and to conduct emergency evacuations.

It would make an already tense cabin environment even more stressful.

We all know that most people do not use appropriate cell phone edicate while in public. Air rage is already a serious issue this will just be adding fuel to the fire. Lets leave well enough alone and keep the aircraft cabins free from cell phone use. Thank you for your time.

Alan
